

Dresser, Inc.

FOR IMMEDIATE RELEASE

**Dresser® Mooney® Announces the Release of its
3D Model Library Which Features CAD Drop-In Regulator Models**

Salt Lake City, UT (July 28, 2010) – Dresser’s Mooney Model Library contains over 220 intricate 3D CAD models of the Mooney and Flexflo® Regulator lines. The library also contains related instructions, a 2D library and a color Adobe® Acrobat® pdf file index for easy model selection. The models are generated from SolidWorks® and are provided in Parasolid format (.x_t) for compatibility on most CAD systems.

CAD designers can save hours of time on a project with this library. Jay Staude, of Pipeline Equipment, Inc. says, “As a fabricator of meter skids that utilize Mooney regulators, I’m able to take a regulator from the 3D library and insert it into my SolidWorks Assembly. This in turn saves me time and also makes my drawings look more realistic for the shop. Also with the model from the 3D library, I’m able to check for interferences that I would not be able to do otherwise.”

All models are available as individual downloads or as a complete library on a USB flash drive by request on the Dresser web site at www.dresser.com/mooney or through a Dresser Mooney Regulator sales representative.
